

ENGIE Resources LLC
Environmental Disclosure Label
Rhode Island – Commercial

This fact sheet provides consumer information about the price, power sources and air emissions of electricity service. Electricity suppliers in Rhode Island must, by law, provide these fact sheets, or “Energy Source Disclosures” on a quarterly basis for the most recent one-year period, to educate consumers about their electricity.

Q3 2023 – Most Recent 12 Month Data Available

This information is effective for the period: January 1, 2023 – December 31, 2023 (Note: This relates to supply only. Your local utility charges separately for delivery service.)				
Service is supplied with power generated using the NEPOOL System mix of resources:		Air Emissions	lbs/MWh	% of System Mix
Power Sources	Resource Mix			
Biogas	0.01266%	Carbon Dioxide	704.94	100.00%
Biomass	1.32545%	Carbon Monoxide	0.58	100.00%
Coal	0.07064%	Mercury	0.08	100.00%
Diesel	1.31183%	Nitrogen Oxides	0.57	100.00%
Digester gas	0.09289%	Particulates	0.27	100.00%
Efficient Resource (Maine)	0.00000%	Sulphur Dioxides	0.31	100.00%
		Organic Compounds	0.04	100.00%
Air-Ground-Water-source heat pump	0.45379%	Particulates (<10 microns)	0.26	100.00%
Fuel Cell / Energy Storage	0.74509%	Power Sources: The actual electricity you use will be indistinguishable from the electricity used by your friends and neighbors. This is unavoidable because everyone is served through the same transmission and distribution system. The energy source disclosure cannot tell you about the electricity that you use in your home; instead, it tells you that your dollars are going to pay for particular power plants. Since it is impossible to track the flow of electricity on the grid, however, there is no way to identify the actual power plant that produced the electricity you consume. But it is possible to track the dollars you pay to particular power plants. Your electricity dollars will support electricity generation from various energy resources in the proportions listed on the power content label.		
Geothermal	0.00024%			
Hydroelectric/Hydropower	6.92479%			
Hydrokinetic	0.00093%			
Jet	0.01176%			
Landfill gas	0.41942%			
Liquid Biofuels	0.10094%			
Municipal solid waste	0.49441%			
Natural Gas	47.42860%			
Nuclear	21.51312%			
Oil	7.44336%			
Solar Photovoltaic	7.56061%			
Solar Thermal	0.00076%			
Trash-to-energy	1.72646%			
Wind	1.72480%			
Wood	16.14506%			
Total	100.00%			

Notes:

1. Electricity customers in New England are served by an integrated power grid, not particular generating units. The above information is based on the most recently available information in the NEPOOL Generation Information System.
2. You can call ENGIE Resources at (866) 693-6443 or the Rhode Island Public Utilities Commission at (401) 941-4500 for additional information.
